

FEDERAL SIGNAL

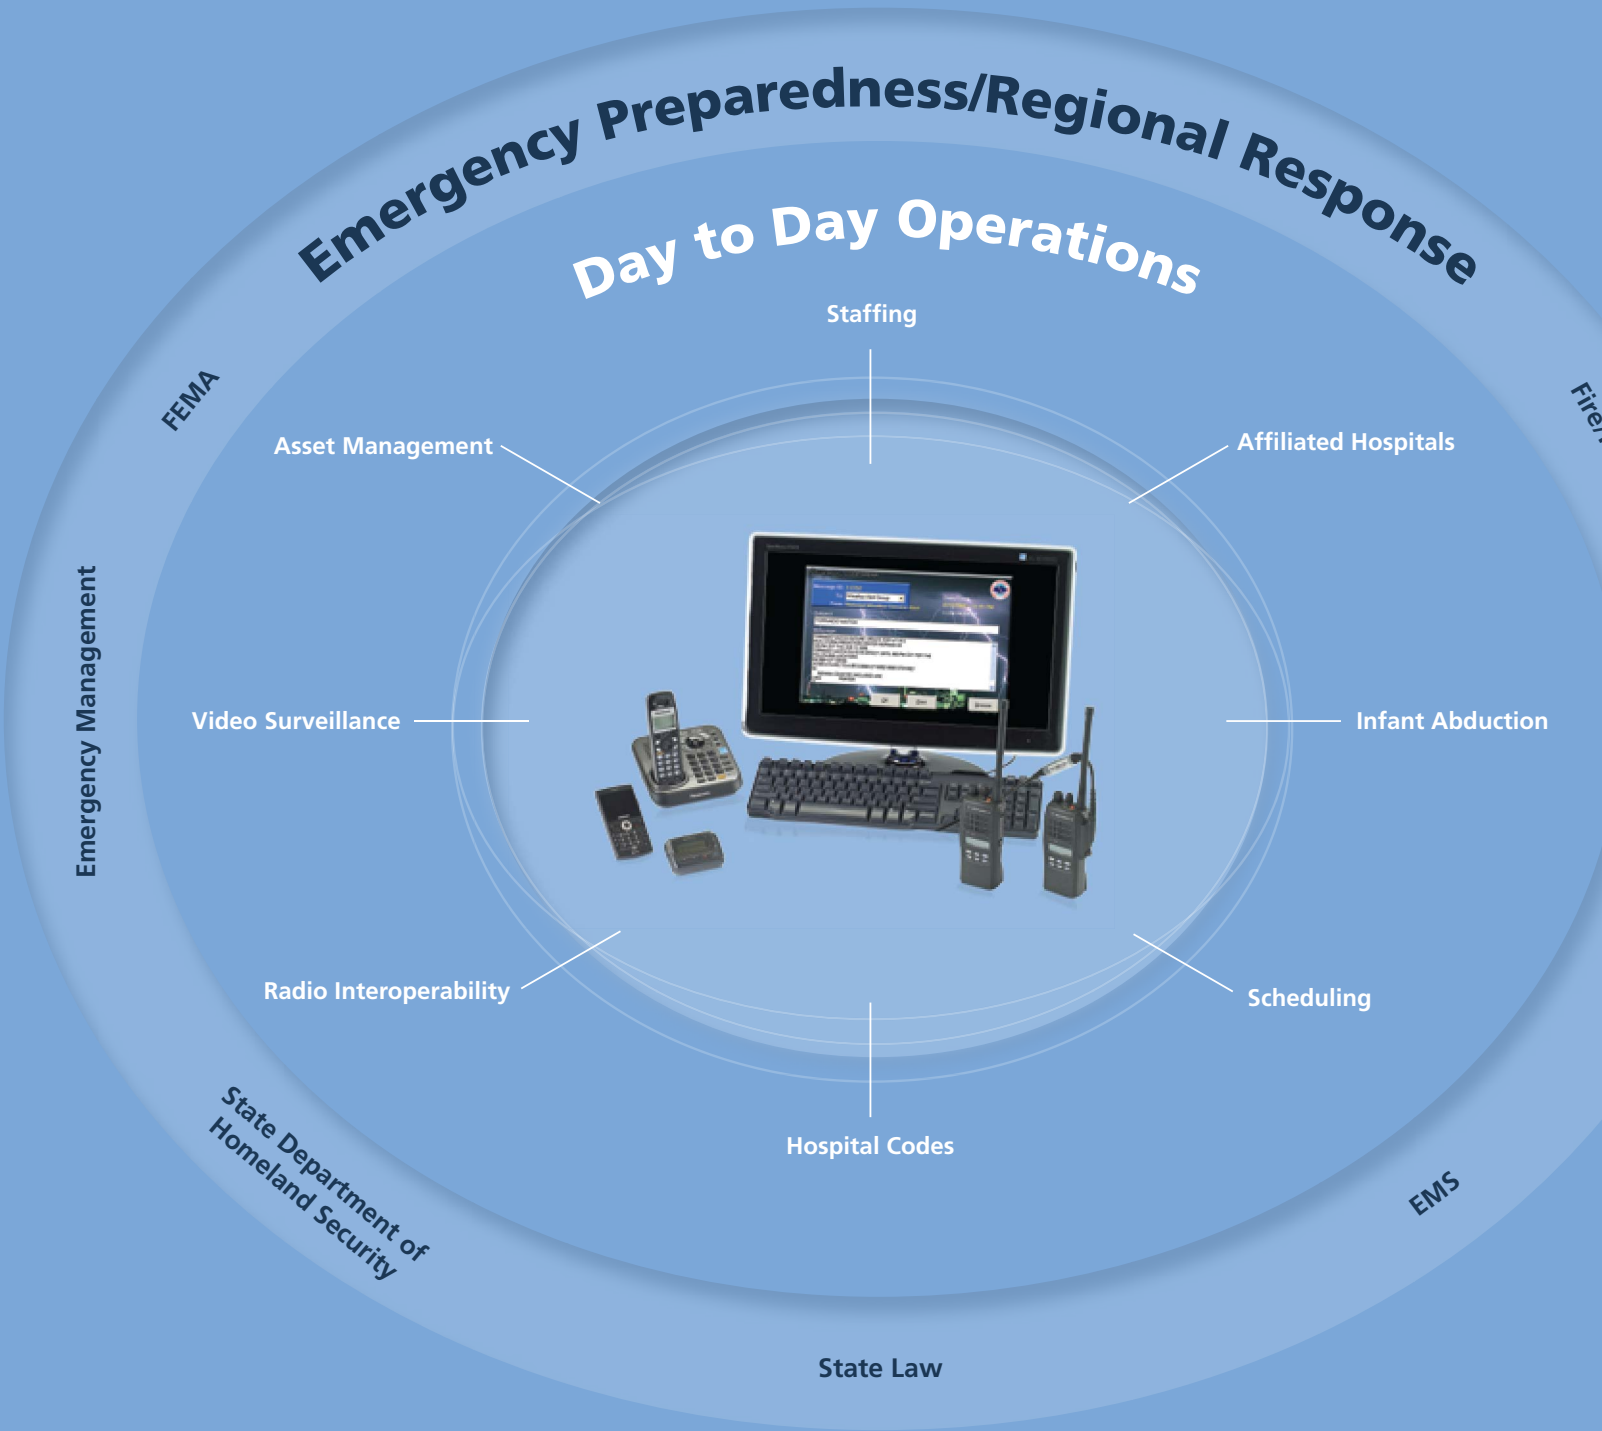

# HEALTH CARE SOLUTIONS

Integrated Notification and Critical Communication Systems

# See the difference in our network

*Simplify and speed the protection of people, property and the environment — every day.*

The need to upgrade emergency preparedness capabilities throughout the health care industry has never been more critical. In response Federal Signal has launched an innovative solution that addresses the growing requirements of emergency preparedness management and communications head on. By focusing on improving communications continuity facility wide, we have created a system that not only elevates the efficiency of emergency response capabilities but also enhances day to day hospital operations. Put simply: Federal Signal's "seamless" communications and notification system enables health care managers to respond to mass casualty emergency disasters in way that is faster, more effective and better coordinated than ever before.

## How to improve day to day operations?

Communications with on-site and off-site personnel ... managing multiple employee databases ... collecting and tracking vital resource information such as surge reporting or facility management. Federal Signal's SmartMsg urgent notification and interoperable communications system allows hospitals to address these daily tasking requirements by channeling all communications through a single interface point.

SmartMsg supports the ability to notify multiple people at multiple locations across multiple modes of communication – everything from cell phones and text messaging, to PCs, radios and more. Just as importantly, SmartMsg is equally adept at acknowledging incoming information on personnel status; coordinating resources; establishing asset availability; and evaluating current facility management capabilities.

On any given day, hospital officials must respond to ever-changing staffing and asset requirements. The SmartMsg notification and communications tool seamlessly streamlines the process by enhancing staff communications, while also improving both operational efficiencies and asset management across all facets of day to day operations.

## Emergency Preparedness/Regional Response:

A health care network's ability to support regional response to a mass casualty incident and maintain operational continuity in the event of a large-scale disaster is uniquely dependent on its capabilities in the areas of mass notification and interoperable communications.

Whether a region is struck with a natural disaster, chemical spill or terrorist event, the ability to alert, notify and facilitate interoperable communications between first responder agencies can become a matter of life and death, literally. The SmartMsg urgent notification and interoperable communication system along with ExpressMsg, RadioLink and ScenarioMgr applications provide hospital networks with the comprehensive communications strategy necessary to meet the emergency response and preparedness challenges of the future.

*Federal Signal is a market leader in providing integrated Alerting and Notification and Unified Interoperable Communication solutions for health care providers and public safety agencies at the local, state and federal government levels around the world. Federal Signal's goal falls nothing short of providing hospitals with solutions to help drive operational efficiencies, lower costs, and raise employee safety and security levels to a point that will affect an overall improvement in patient care.*

## > Federal Signal at a glance

**For more than 100 years, we have listened to our customers and imagined new ways to help meet their evolving demands for safety and security.**

### **You are never out of sight or sound of Federal Signal**

We bring together the best products and technologies to support local, state and national governmental leaders in more than 100 countries. Our robust and reliable integrated systems are in use every day in cities such as Amsterdam, Barcelona, Beijing, Boston, Chicago, Cincinnati, Istanbul, Kansas City, Lima, London, Los Angeles, Mexico City, Miami, Moscow, New York City, Paris, Rome and Vancouver.

### **Total solutions to serve and protect**

Federal Signal offers community leaders a portfolio of networked systems to protect people, property and the environment – every day. Our total solutions include:

- Automated license plate recognition
- Campus alerting
- Citizen alerting
- Community-wide alerting
- Congestion charging
- Interoperable communications
- In-vehicle video and data
- Journey time measurement
- Lights, sirens and speakers
- Mobile data systems
- Personnel alerting
- Public safety software
- Toll enforcement and road-user charging
- Towing and recovery
- Audible and visual warning
- Back-up camera
- Debt collection
